

# Ipswitch File Transfer Products Overview

Ipswitch products meet the file transfer needs of any organization from small and departmental to global 2000 companies. Millions of users and tens of thousands of companies globally use WS\_FTP Server and MOVEit Managed File Transfer to transfer large files easily, reliably and securely.

Trusted & reliable  
Secure FTP Server  
Meet budget  
& feature needs

End-to-end encryption  
Guaranteed delivery  
Meet compliance requirements  
Scalable / HA / DR

SCALE OF FILE TRANSFER NEEDS

## Why use Ipswitch file transfer products?

### RELIABLE AND SECURE FILE TRANSFER SERVER FOR LARGE FILES

#### WS\_FTP Server

WS\_FTP Server is the market leading commercial FTP server used by customers for 20+ years. It is accessible from web browsers, Outlook email plugin or any FTP client. WS\_FTP installs in minutes and quickly enables your organization to transfer large files using standard and secure FTP/HTTP protocols encrypting files while in transit. Administration includes visibility to file transfer activity data and rules for automated notifications. It can be deployed with local server failover. Live telephone technical support is available.

### MANAGED FILE TRANSFER FOR SECURITY & COMPLIANCE

#### MOVEit File Transfer (DMZ) Server

MOVEit File Transfer Server delivers file transfer technology to enable compliance with global security regulations including PCI/DSS, HIPAA/HITECH, SOX, GDP, and BASEL I, II & III. Files are protected while in transit, using standard secure HTTPS, FTPS, and SFTP protocols, and at rest, using FIPS 140-2 validated 256-bit AES encryption. It provides guaranteed delivery (non-repudiation, file integrity checking, and fail-safe transmission), encryption key management, single sign-on from all supported clients (including mobile devices), while eliminating storage of data in the DMZ. Centralized visibility, control and reports for auditing of user and events log data is essential for effective compliance. Integration with existing IT security infrastructure provides additional security and reduces administrative overhead.

### AUTOMATED FILE MOVEMENT FOR ENHANCED PRODUCTIVITY AND SECURITY

#### MOVEit Central

MOVEit Central enables automation of repetitive file-based business and administrative tasks. Automated movement of files can also eliminate the need for any external access to the trusted network by retrieving files from partner FTP servers and moving encrypted files to the DMZ for external retrieval. MOVEit Central works with any FTP or MFT server including WS\_FTP Server, MOVEit File Transfer DMZ Server and MOVEit Cloud.

### CLOUD-BASED FILE TRANSFER SERVICES FOR COST-MANAGED COMPLIANCE

#### MOVEit Cloud

MOVEit Cloud offers exceptional value as a cloud-based managed file transfer solution: cost predictability and managed SLA (99.9% uptime). As a trusted partner for compliance Ipswitch uniquely delivers signed business associate agreement (BAA), rigorously defined matrix of responsibility, third party audited compliance, intrusion detection and penetration testing, and hardened datacenter (CIS benchmarks and SSAE 16 type II audited).

# Ipswitch File Transfer Products Overview

## MANAGED FILE TRANSFER WITH BUSINESS CONTINUITY & DATA BACKUP

### MOVEit File Transfer (DMZ) Server and MOVEit Cloud

MOVEit has a flexible architecture designed for horizontal scalability, high availability, failover and disaster recovery configurations. It scales to support thousands of users and terabytes of data transfer with a centralized repository. Redundant failover can be achieved within a single site or geographically disperse datacenter. It provides continuous file transfer operations with loss of service measured in seconds or minutes. It can be configured for manual or automated failover and provides compliance with regulations and policies requiring data back up to protect against any data loss.

## Ipswitch Portfolio of File Transfer Products – Key Capabilities

MOVEit FILE TRANSFER	MOVEit MOBILE	MOVEit AD HOC TRANSFER	MOVEit CENTRAL
Secure server for Moving Files	Productivity for your mobile workforce	Employees and partners can send sensitive files	Make file-based automation easy and reliable

SECURE EMAIL ATTACHMENT	PROFESSIONAL	PREMIUM
Employees and partners can send sensitive files	Transfer sensitive files using folders from anywhere, including mobile devices	Access all features in <i>Secure Email Attachment Professional</i> options

WS_FTP server	Web Transfer Module	Ad Hoc Transfer For WS_FTP	MOVEit CENTRAL
Secure server for Moving Files	Add-on module for browser-based file transfer	Add-on module for person-to-person file transfer	Make file-based automation easy and reliable

## Ipswitch File Transfer Products Feature Comparison

FILE DELIVERY	WS_FTP			MOVEit FT (DMZ)	MOVEit Cloud
	WS_FTP	SSH	Corporate		
FTP, SSL/FTPS	x	x	x	x	x
HTTP, HTTPS	Optional: WTM	Optional: WTM	x	x	x
SSH/SFTP	-	x	x	x	x
SCP2 (Secure copy)	-	-	x	-	-
AS1, AS2, and AS3	-	-	-	x	x
Guaranteed delivery (non-repudiation, integrity check, and transmission resume)	-	-	-	x	x
<b>END-POINT CAPABILITIES</b>					
Web browser including customizable browser UI	Optional: WTM (max 2 GB upload)	Optional: WTM (max 2 GB upload)	x (max 2 GB upload)	x	x
Browser plug-ins for guaranteed delivery of large files	-	-	-	x	x
Outlook email client	Optional: Ad Hoc Module (1-way; 20 GB size limit)	Optional: Ad Hoc Module (1-way; 20 GB size limit)	Optional: Ad Hoc Module (1-way; 20 GB size limit)	Optional: Ad Hoc Module (2-way; No file size limit)	x
Mobile devices	-	-	-	Optional: MOVEit Mobile	x
User and group access control	-	-	-	x	x
Sync client for automated file movement to desktop	-	-	-	x	x
<b>USER AUTHENTICATION / MANAGEMENT</b>					
LDAP support	-	-	x	x	x
Radius support	-	-	-	x	-
Support SAML 2.0 to IdP systems	-	-	-	x	x
Single sign-on	-	-	-	x	x
Multi-factor authentication	-	x	x	x	x
Delegated administration	-	-	-	x	x
Secure 'multi-tenancy' (isolate users and/or files)	-	-	-	x	x
<b>AUTOMATED FILE-BASED TASKS &amp; APIs</b>					
Push/pull files from any FTP/SFTP/FTPS server or network share/UNC path.	Optional: MOVEit Central	Optional: MOVEit Central	Optional: MOVEit Central	Optional: MOVEit Central	Optional: MOVEit Central
API interface	-	-	-	x	x
<b>FILE TRACKING, ALERTS AND REPORTING</b>					
Extensive and customizable reporting	-	-	-	x	x
User and group statistics for auditing	-	-	-	x	x
<b>SECURITY, COMPLIANCE &amp; FAILOVER</b>					
AES-256 encryption for files at rest	-	-	-	x	x
Integration with antivirus and Data Loss/Leak Prevention solutions	-	-	-	x	-
Restrict external access to trusted network	Optional: MOVEit Central and PGP Module	Optional: MOVEit Central and PGP Module	Optional: MOVEit Central and PGP Module	Optional: MOVEit Central	Optional: MOVEit Central
No data in DMZ: multi-domain authorization	-	-	-	x	x
Hardened security settings and OS independent security	-	-	-	x	x
Hardened datacenter: SSAE 16 Type II audited	-	-	-	-	x
3rd party-validated PCI/HIPAA/GLBI compliance	-	-	-	-	x
Scalable and HA with 99.9% Guaranteed Uptime	-	-	-	-	x
Tamper-evident log database	-	-	-	x	x
Redundant failover to local or remote (WAN) locations	-	-	-	x	x
